2008 IDAHO WHEAT VARIETIES - SUPPLEMENT

During the 2008 survey, we collected positive reports for 114 different wheat varieties. The top twenty varieties account for 74.0 percent of the wheat planted in Idaho for the 2008 crop. This supplement lists estimates for 27 additional varieties which account for 19.8 percent of Idaho's total wheat planted.

Included in the report are acreages of wheat in which multiple varieties were mixed at seeding. A total of 20 different combinations of wheat varieties were reported. Only one of these combinations had sufficient reports and acreage to be published.

New varieties listed in this supplemental report that were not listed in last year's wheat variety reports include; Mohler, Jerome, Hiller, and Wawaiwai.

Partial funding for the 2008 Idaho Wheat Variety Survey was provided by the Idaho Wheat Commission.
